ABOUT

I am a 24 years old front-end developer with a bachelor's degree in Computer Science. I had the opportunity to work on a few projects during my academic life, creating interfaces and coding several simple sites as a hobby. I've worked as a front-end developer in a team with a designer and a content producer in the creation of a new startup focused on web development. Now I am looking for a chance to use the knowledge acquired both in courses and in my projects to grow professionally.
